- Ø Molded length 198.00 mt
- Ø Molded depth 9.90 mt
- Ø Maximum draft 6.80 mt
- Ø Tonnage GT 31730 ton

Cargo Capacity:

- Ø Cars 100
- Ø Trailers 166

Other description add:

- 1) 1800 Passengers & 450 Cars can be transported.
- 2) Electrical 3 a.A. MWM = 3500 KW
- 3) Engine Details & Mechanical:

Ø Four diesel engines and two gas turbines supply the power 95.000 hp. The gas turbines are connected to the two booster water jets, while the diesels are connected to the biggest steering water jets ever then built.

Ø Four diesel engines are MTU 20V 1163 20V TB73 L units rated 6.500KW each and the two gas turbines are LM 2500 systems rated at 22.000KW each.

Ø The system includes two double inlet reduction gears (diesel shafts), two reduction gears (gas turbines), two booster water jets (gas turbines and two wing steering water jets (diesel shafts). Two bow thrusters.

Ø The high flexibility of the propulsion system allows the ship to have three operative speeds.
